FUND SUMMARY: THE SPAC AND NEW ISSUE ETF

Investment Objectives: The SPAC and New Issue ETF (the “Fund”) seeks to provide total return.

Fees and Expenses of the Fund: This table describes the fees and expenses, excluding any brokerage fees, that you may pay if you buy, sell, and hold shares of the Fund.

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.83%
Other Expenses	0.48%
Total Annual Fund Operating Expenses	1.31%
Fee Waiver and Expense Reimbursement ⁽¹⁾	(0.36%)
Total Annual Fund Operating Expenses After Fee Waiver and Reimbursement	0.95%

(1) The Adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through January 31, 2024 to ensure that Net Annual Fund Operating Expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, (vii) other fees related to underlying investments, (such as option fees and expenses or swap fees and expenses); or (viii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 0.95%. This expense limitation agreement may be terminated at any time, by the Board upon sixty days written notice to the Adviser. The expense limitation agreement will automatically terminate, if the Investment Advisory Agreement is terminated.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example further assumes that the Fund’s operating expense limitation agreement will only be in place for the term specified above. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$97	\$380	\$684	\$1,548

PORTFOLIO TURNOVER: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, may adversely affect the Fund’s performance. For the fiscal year ended September 30, 2022, the Fund had a portfolio turnover of 51%.

PRINCIPAL INVESTMENT STRATEGIES:

The Fund is an actively managed exchange traded fund. In pursuing the Fund’s investment objective, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in units and shares of Special Purpose Acquisitions Companies (“SPACs”) that have a

minimum capitalization of \$100 million and companies that completed an initial public offering (“IPO”) within the last two years. A SPAC is a blank check company that has not yet merged with an operating company. SPACs are formed for the purpose of effecting a merger, share exchange, asset acquisition, share purchase, reorganization or similar business combination with one or more businesses. SPACs often have pre-determined time frames to merge (typically two years) or the SPAC will liquidate. A SPAC generally offers units, each comprised of one share of common stock and a warrant (or portion of a warrant) to purchase common stock. A warrant is a security that allows its holder to purchase a specified amount of common stock at a specified price for a specified time. The Fund may seek to sell warrants that it receives in connection with the purchase of a SPAC’s units in order to generate additional returns for shareholders. The Fund may purchase units or shares of SPACs that have completed an IPO within the last two years on a secondary market or during a SPAC’s IPO. A SPAC that has completed a business transaction within the last two-years is considered a company that has completed an IPO within the last two-years. The Fund may enter into swap agreements on publicly traded SPACs and individual U.S. equities of any market capitalization that have completed an initial public offering within the last two-years. The Fund utilizes swap agreements in order to receive the returns associated with owning a SPAC or company that completed an initial public offering within the last two-years without the cost associated with directly investing in the SPAC or company. The Fund will utilize swap agreements to increase leverage in the Fund’s investments.

The Fund may also invest in depositary receipts or appropriate ETFs for cash management purposes or due to a lack of suitable investment opportunities, the Fund may hold up to 20% of its net assets in cash or similar short-term, high-quality debt securities.

The Adviser utilizes fundamental analysis to identify investment opportunities with favorable attributes, to evaluate industry dynamics, measure the strength of the business model and management skill. The Adviser will perform research and due diligence on the SPAC sponsors or management teams. The Adviser’s evaluation of the sponsor will include the sponsor’s history in allocating capital, securing financing, experience managing public companies, and background in the area/industry where the SPAC is searching for a business combination. The Adviser may sell a position when a SPAC either announces a business combination or the price increases. In managing the Fund’s portfolio, the Adviser will engage in frequent trading, resulting in a high portfolio turnover rate.

PRINCIPAL RISKS: As with all ETFs, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value and performance.

- *SPAC Risk:* The Fund invests in SPACs and companies that have completed an IPO. SPACs are companies that may be unseasoned and lack a trading or operational history, a track record of reporting to investors, and widely available research coverage. The Fund may purchase SPACs through an IPO. IPOs are thus often subject to extreme price volatility and speculative trading. These stocks may have above-average price appreciation in connection with the IPO. In addition, IPOs may share similar illiquidity risks of private equity and venture capital. The free float shares held by the public in an IPO are typically a small percentage of the market capitalization. The ownership of many IPOs often includes large holdings by venture capital and private equity investors who seek to sell their shares in the public market in the months following an IPO when shares restricted by

lock-up are released, causing greater volatility and possible downward pressure during the time that locked-up shares are released. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination.

- *ADR Risk:* ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. In a sponsored ADR arrangement, the foreign issuer assumes the obligation to pay some or all of the depositary's transaction fees. Under an unsponsored ADR arrangement, the foreign issuer assumes no obligations and the depositary's transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through.
- *Counterparty Risk:* A counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest or settlement payments, or otherwise honor its obligations.
- *Derivatives Risk:* The use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities.

ETF Structure Risks. The Fund is structured as an ETF and as a result is subject to special risks, including:

- *Not Individually Redeemable.* The Fund's shares ("Shares") are not redeemable by retail investors and may be redeemed only by Authorized Participants at net asset value ("NAV") and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.

- *No Guarantee of Active Trading Market.* While Shares are listed on the Exchange, there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.
- *Trading Issues.* Trading in Shares on the Nasdaq Stock Market LLC (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange which may result in the Shares being delisted. An active trading market for the Shares may not be developed or maintained. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as Authorized Participants that can post collateral on an agency basis is limited, which may limit the market for the Shares.
- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the Shares. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
 - In times of market stress, market makers may step away from their role market making in the Shares and in executing trades, which can lead to differences between the market value of the Shares and the Fund's NAV.
 - The market price of the Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less the Shares than the Fund's NAV, which is reflected in the bid and ask price for the Shares or in the closing price.
 - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and the Fund's NAV.

Authorized Participant Risk. Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as an Authorized Participant on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized Participant concentration risk may be heightened for securities or instruments that have lower trading volumes.

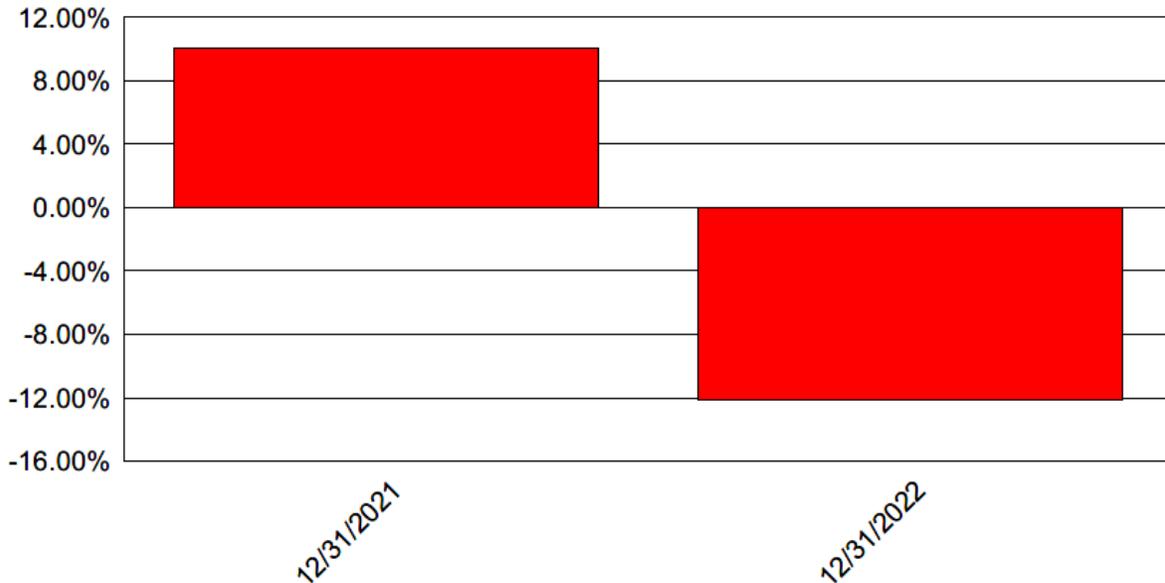

- *Large Capitalization Stock Risk:* Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.
- *Leverage Risk:* The use of leverage by the Fund, such as borrowing money to purchase securities or the use of options, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.
- *Liquidity Risk:* Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.
- *Management Risk:* The Adviser's assessment of the attractiveness and potential appreciation of particular investments or markets in which the Fund invests may prove to be incorrect and there is no guarantee that Adviser's investment strategy will produce the desired results, causing losses for the Fund.
- *Market and Geopolitical Risk:* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change and climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects.
- *Portfolio Turnover Risk:* Portfolio turnover results in higher brokerage commissions, dealer mark-ups and other transaction costs and may result in taxable capital gains. Higher costs associated with increased portfolio turnover may offset gains in the Fund's performance.
- *Pre-Determined Time Frame Risk:* SPACs typically have a pre-determined timeframe to merge with an operating company or they will liquidate. If a SPAC is unable to find a merger target, the Fund's returns may be diminished.
- *Small and Medium Capitalization Stock Risk:* The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally

have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

- *Swaps Risk:* Swaps are subject to tracking risk because they may not be perfect substitutes for the instruments they are intended to hedge or replace. Over the counter swaps are subject to counterparty default. Leverage inherent in derivatives will tend to magnify the Fund's losses.
- *Warrant Risk:* Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life ranging from less than one year to twenty years, or they may be perpetual. However, most warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

Performance: The bar chart and performance table below show the variability of the Fund's returns over time, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund's shares over time to the performance of a broad-based market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information will be available at no cost by calling (866) 904-0406 and may also be available at www.spcxfund.com.

Performance Bar Chart

Best Quarter: 3/31/2021 10.63%

Worst Quarter: 12/31/2022 -6.05%

The Fund's year-to-date return as of the most recent fiscal quarter, which ended December 31, 2021, was 10.08%

Average Annual Total Returns (as of December 31, 2022)	<u>One Year</u>	<u>Life of Fund</u>
Return Before Taxes	-12.11%	-0.06%
Return After Taxes on Distributions	-12.11%	-0.32%
Return After Taxes on Distributions and Sale of Fund Shares	-7.17%	-0.14%
Index IQ Merger Arbitrage ⁽¹⁾	-1.49%	-2.21%

⁽¹⁾ The IQ Merger Arbitrage Index seeks to achieve capital appreciation by investing in global companies for which there has been a public announcement of a takeover by an acquirer. This differentiated approach is based on a passive strategy of owning certain announced takeover targets with the goal of generating returns that are representative of global merger arbitrage activity. The Index also includes short exposure to global equities as a partial equity market hedge. An investor cannot invest directly in the index.

Adviser: Tuttle Capital Management, LLC.

Portfolio Manager: Matthew Tuttle has been the Fund's the portfolio manager since its inception in December 2020.

Purchase and Sale of Fund Shares: The Fund will issue and redeem Shares at net asset value per Share ("NAV") only in large blocks of 25,000 Shares (each block of Shares is called a "Creation Unit"). Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on Nasdaq Stock Market LLC and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-free plan. If you are investing through a tax free plan, you will be taxed upon withdrawal from your account.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objectives

The Fund seeks to provide total return. The Fund may change its investment objective upon 60 days' written notice to shareholders.

Principal Investment Strategies

The Fund is an actively managed exchange traded fund. In pursuing the Fund's investment objective, the Fund:

- will invest at least 80% of its net assets (plus any borrowings for investment purposes) in units and shares of Special Purpose Acquisitions Companies ("SPACs") that have a minimum capitalization of \$100 million and companies that completed an initial public offering ("IPO") within the last two years.
- may seek to sell SPAC warrants that it receives in connection with the purchase of a SPAC's units in order to generate additional returns for shareholders.

- may invest in depositary receipts for cash management purposes.

For cash management purposes or due to a lack of suitable investment opportunities, the Fund may hold up to 20% of its net assets in cash or similar short-term, high-quality debt securities. The Fund may purchase units of SPACs that have completed an IPO within the last two years on a secondary market or in a SPAC IPO. A SPAC that has completed a business transaction within the last two-years is considered a company that has completed an IPO within the last two-years. The Fund may enter into swap agreements on publicly traded SPACs and individual U.S. equities of any market capitalization that have completed an IPO within the last two-years. The Fund utilizes swap agreements in order to receive the returns associated with owning a SPAC or company that completed an initial public offering within the last two-years without the cost associated with directly investing in the SPAC. The Fund will utilize swap agreements to increase leverage in the Fund's investments.

The Adviser utilizes fundamental analysis to identify investment opportunities with favorable attributes, to evaluate industry dynamics, measure the strength of the business model and management skill. The Adviser utilizes its analysis and research to avoid concentrating the Fund's assets in an industry. The Adviser will perform research and due diligence on the SPAC sponsors or management teams. The Adviser's evaluation of the sponsor will include the sponsor's history in allocating capital, securing financing, experience managing public companies, and background in the area/industry where the SPAC is searching for a business combination. The Adviser may sell a position when it a SPAC either announces a business combination or the price increases. In managing the Fund's portfolio, the Adviser will engage in frequent trading, resulting in a high portfolio turnover rate.

Principal Investment Risks

There is no assurance that the Fund will achieve its investment objective. The Fund's share price will fluctuate with changes in the market value of its portfolio securities. When you sell your Fund shares, they may be worth less than what you paid for them and, accordingly, you can lose money investing in the Fund. The following risks could adversely affect the net asset value, total return and the value of the Fund and your investment. The risk descriptions below provide a more detailed explanation of the principal investment risks that correspond to the risks described in the Fund's Summary section of this Prospectus. The Fund expects to participate in IPOs of SPACs, secondary market transactions, private placement in public equities and investments in vehicles formed by SPAC sponsors to hold founder shares, which are private rights and other interests issued by a SPAC.

SPAC Risk: SPAC Risk: The Fund invests in SPACs and companies that have completed an IPO. SPACs are companies that may be unseasoned and lack a trading or operational history, a track record of reporting to investors, and widely available research coverage. The Fund may purchase SPACs through an IPO. IPOs are thus often subject to extreme price volatility and speculative trading. These stocks may have above-average price appreciation in connection with the IPO. In addition, IPOs may share similar illiquidity risks of private equity and venture capital. The free float shares held by the public in an IPO are typically a small percentage of the market

capitalization. The ownership of many IPOs often includes large holdings by venture capital and private equity investors who seek to sell their shares in the public market in the months following an IPO when shares restricted by lock-up are released, causing greater volatility and possible downward pressure during the time that locked-up shares are released. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. The Fund may invest in vehicles formed by SPAC sponsors to hold founder shares, which may be subject to forfeiture or expire worthless and which generally have less liquidity than SPAC shares issued in an IPO. The Fund may experience material losses as a result of forfeited founder shares or founder shares that expire worthless.

ADR Risk: ADRs, which are typically issued by a bank, are certificates that evidence ownership of shares of a foreign company and are alternatives to purchasing foreign securities directly in their national markets and currencies. ADRs are subject to the same risks as direct investment in foreign companies and involve risks that are not found in investments in U.S. companies. In addition to the risks of investing in foreign securities discussed below, there is no guarantee that an ADR issuer will continue to offer a particular ADR. As a result, the Fund may have difficulty selling the ADR, or selling them quickly and efficiently at the prices at which they have been valued. In a sponsored ADR arrangement, the foreign company assumes the obligation to pay some or all of the depositary's transaction fees. Under an unsponsored ADR arrangement, the foreign company assumes no obligations and the depositary's transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the foreign company, available information concerning the foreign company may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through. ADRs may not track the price of the underlying foreign securities on which they are based, and their value may change materially at times when U.S. markets are not open for trading. Certain ADRs are not listed on an exchange and therefore may be considered to be illiquid.

Counterparty Risk: The Fund may engage in transactions in securities and financial instruments that involve counterparties. Counterparty risk is the risk that a counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest or settlement payments, or otherwise honor its obligations. To limit the counterparty risk associated with such transactions, the Fund conducts business only with financial institutions judged by the Adviser to present acceptable credit risk.

Derivatives Risk: The Fund's use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including,

but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities including:

- *Leverage and Volatility Risk:* Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, including futures contracts, permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. The use of leveraged derivatives can magnify the Fund's potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's share price.
- *Liquidity Risk:* It is possible that particular derivative investments might be difficult to purchase or sell, possibly preventing the Fund from executing positions at an advantageous time or price, or possibly requiring them to dispose of other investments at unfavorable times or prices in order to satisfy their obligations. Most U.S. commodity futures exchanges impose daily limits regulating the maximum amount above or below the previous day's settlement price which a futures contract price may fluctuate during a single day. During a single trading day no trades may be executed at prices beyond the daily limit. Once the price of a particular futures contract has increased or decreased to the limit point, it may be difficult, costly or impossible to liquidate a position. It is also possible that an exchange or the Commodity Futures Trading Commission, which regulates commodity futures exchanges, may suspend trading in a particular contract, order immediate settlement of a contract or order that trading to the liquidation of open positions only.

ETF Structure Risks. The Fund is structured as an ETF and as a result is subject to special risks, including:

- *Not Individually Redeemable.* The Fund's shares ("Shares") are not redeemable by retail investors and may be redeemed only by Authorized Participants at net asset value ("NAV") and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.
- *No Guarantee of Active Trading Market.* While Shares are listed on the Exchange, there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.
- *Trading Issues.* Trading in Shares on the Nasdaq Stock Market LLC (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange,

make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange which may result in the Shares being delisted. An active trading market for the Shares may not be developed or maintained. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as Authorized Participants that can post collateral on an agency basis is limited, which may limit the market for the Shares.

- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the Shares. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
 - In times of market stress, market makers may step away from their role market making in the Shares and in executing trades, which can lead to differences between the market value of the Shares and the Fund’s NAV.
 - The market price of the Shares may deviate from the Fund’s NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less the Shares than the Fund’s NAV, which is reflected in the bid and ask price for the Shares or in the closing price.
 - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund’s portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and the Fund’s NAV.

Large Capitalization Stock Risk: Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.

Leverage Risk: Using derivatives can create leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of mutual funds that do not use such techniques.

Liquidity Risk: Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.

Management Risk: The Adviser’s assessment of the attractiveness and potential appreciation of particular investments or markets in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser’s investment strategy will produce the desired results.

Market and Geopolitical Risk: The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change and climate-related events, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. The novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses, had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns.

Portfolio Turnover Risk: A higher portfolio turnover may result in higher transactional and brokerage costs associated with the turnover which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder. The Fund's portfolio turnover rate may exceed 100% annually.

Pre-Determined Time Frame Risk: SPACs typically have a pre-determined timeframe to merge with an operating company or they will liquidate. If a SPAC is unable to find a merger target, the Fund's returns may be diminished.

Small and Medium Capitalization Stock Risk: The stocks of small and medium capitalization companies involve substantial risk. These companies may have limited product lines, markets or financial resources, and they may be dependent on a limited management group. Stocks of these companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.

Swap Risk: The Fund may use swaps to enhance returns and manage risk. The Fund's use of swaps involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by

numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, including futures contracts, permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. The use of leverage may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet collateral segregation requirements. The use of leveraged derivatives can magnify the Fund's potential for loss and, therefore, amplify the effects of market volatility on the Fund's share price.

Warrant Risk: Warrants are options to purchase common stock at a specific price (usually at a premium above the market value of the optioned common stock at issuance) valid for a specific period of time. Warrants may have a life ranging from less than one year to twenty years, or they may be perpetual. However, most warrants have expiration dates after which they are worthless. In addition, a warrant is worthless if the market price of the common stock does not exceed the warrant's exercise price during the life of the warrant. Warrants have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. The percentage increase or decrease in the market price of the warrant may tend to be greater than the percentage increase or decrease in the market price of the optioned common stock.

Temporary Investments: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, and U.S. Government securities. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure: A description of the Fund's policies and regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI").

Cybersecurity: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and their service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT OF THE FUND

Investment Adviser

Tuttle Capital Management, LLC, located at 155 Lockwood Rd, Riverside, CT 06878, serves as investment adviser to the Fund. Subject to the oversight and authority of the Board, the Adviser is responsible for the overall management of the Fund's business affairs. The Adviser is responsible for selecting the Fund's investments according to the Fund's investment objective, policies, and restrictions.

Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser (the "Investment Advisory Agreement"), the Fund pays the Adviser, on a monthly basis, an annual advisory fee of 0.83% of the Fund's average daily net assets. For the fiscal year ended September 30, 2022, the Fund paid the Adviser (net of fee waivers) 0.47% of the Fund's average daily net assets. A discussion regarding the basis for the Board's approval of the Investment Advisory Agreement is available in the Fund's semi-annual shareholder report dated March 31, 2022.

The Adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through January 31, 2024 to ensure that Net Annual Fund Operating Expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, (vii) other fees related to underlying investments, (such as option fees and expenses or swap fees and expenses); or (viii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 0.95%. This expense limitation agreement may be terminated at any time, by the Board upon sixty days written notice to the Adviser. The expense

limitation agreement will automatically terminate, if the Investment Advisory Agreement is terminated.

Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance.

Portfolio Manager

Matthew Tuttle is responsible for the day-to-day management of the Fund. Matthew Tuttle founded the Adviser in 2012 and serves its chief executive officer and chief investment officer.

The Fund's SAI provides additional information about the portfolio manager's compensation structure, other accounts managed by each portfolio manager, and the portfolio manager ownership of Fund shares.

NET ASSET VALUE

The net asset value ("NAV") and offering price (NAV plus any applicable sales charges) of each class of shares is determined as of the close of the New York Stock Exchange ("NYSE") (normally 4:00 p.m. Eastern Time) on each day the NYSE is open for business (the "Valuation Time"). NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

The Fund's securities or other investment assets for which market quotations are readily available will be valued at current market value based upon such market quotations as of the Valuation Time. The Fund may use independent pricing agents to provide current market values. Generally, a Fund's securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith and evaluated as to the reliability of the fair value method used by the Board on a quarterly basis, in accordance with procedures approved by the Board. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available

shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined using the “fair value” procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has designated execution of these procedures to the Adviser. The team may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for a Fund. The Fund may invest in foreign securities that are primarily listed on foreign exchanges that may trade on weekends or other days when the Fund does not price its shares, the value of the Fund’s portfolio may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in a Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the securities will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value or the price that may be realized upon the actual sale of the security.

With respect to any portion of a Fund’s assets that are invested in one or more open-end management investment companies that are registered under the 1940 Act, the Fund’s net asset value is calculated based upon the net asset values of the registered open-end management investment companies in which the Fund invests, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

Premium/Discount Information

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers at market prices and the Fund’s Shares will trade at market prices. The market price of Shares of the Fund may be greater than, equal to, or less than NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares of the Fund.

Information regarding how often the Shares of the Fund traded at a price above (at a premium to) or below (at a discount to) the NAV of the Fund during the past four calendar quarters, when available, can be found at www.spcxfund.com.

HOW TO BUY AND SELL SHARES

Shares of the Fund will be listed for trading on the Exchange under the symbol SPCX. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares, and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized Participants that have entered into contracts with the Fund's distributor may acquire Shares directly from the Fund, and Authorized Participants may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units, of 25,000 Shares. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

Share Trading Prices

The approximate value of Shares of the Fund, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares of the Fund and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a "real-time" update of the NAV per Share of the Fund because the approximate value may not take into account certain Fund expenses and may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Fund does not make any warranty as to the accuracy of these values.

Book Entry

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” form.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund’s Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants who have entered into agreements with the Fund’s distributor. The vast majority of trading in the Fund’s Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (i.e., for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objective. However, direct trading by Authorized Participants is critical to ensuring that the Fund’s Shares trade at or close to NAV. The Fund also employ fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund impose transaction fees on purchases and redemptions of Fund Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that a Fund’s trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund’s Shares.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

Unlike interests in conventional mutual funds, which typically are bought and sold from and to the fund only at closing NAVs, the Fund’s Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day’s next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on a Fund’s portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares’ in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid annually by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Taxes on Distributions

As stated above, dividends from net investment income, if any, ordinarily are declared and paid annually by the Fund. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (i.e., dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Fund shares at the rate for net capital gain -- a maximum of 15% for taxable years beginning before 2013. A part of the Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends each Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund (if that option is available). Distributions reinvested in additional Shares of the Fund through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income

or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund is required to withhold 28% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

Taxes on Purchase and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An Authorized Participant that exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and the Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See "TAX STATUS" in the SAI for more information.

FUND SERVICE PROVIDERS

Citi Fund Services Ohio, Inc. is the Fund's administrator and fund accountant. It has its principal office at 4400 Easton Commons, Suite 200, Columbus, Ohio 43219, and is primarily in the business of providing administrative, fund accounting and regulatory filing services to retail and institutional mutual funds.

Citibank N.A., is the Fund's custodian. It has its principal office at 388 Greenwich Street, New York, NY 10048.

ACA Foreside Fund Services, LLC (the "Distributor"), located at Three Canal Plaza, Suite 100, Portland, ME 04101, is the distributor for the shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, Ohio 43215, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 342 N. Water St. Suite 830, Milwaukee, WI 53202 serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

OTHER INFORMATION

Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not "underwriters" but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

FINANCIAL HIGHLIGHTS

The financial highlights tables are intended to help you understand the Fund's financial performance for the period of the Fund's operations. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund. The September 30, 2022 information for the Fund has been derived from the financial statements audited by Cohen & Company, Ltd., the Fund's independent registered public accounting firm, whose report, along with the Funds' financial statements, are included in the Fund's September 30, 2022 annual report, which is available upon request.

Financial Highlights	Year Ended September 30, 2022	December 15, 2020 ^(a) through September 30, 2021
The SPAC and New Issue ETF		
Net Asset Value, Beginning of Period	\$28.72	\$25.00
Net Investment Income (Loss) ^(b)	(0.25)	(0.26)
Net Realized and Unrealized Gains (Losses) on Investments ^(c)	(1.89)	3.98
Total from Investment Activities	(2.14)	3.72
Distributions from Net Investment Income	(0.36)	—
Distributions from Net Realized Gains on Investments	—	—
Total Distributions	(0.36)	—
Impact of NAV error	0.02	—
Net Asset Value, End of Period	\$26.24	\$28.72
Net Assets at End of Period (000's)	\$30,176	\$85,444
Total Return at NAV ^{(d)(e)}	(7.47)%	14.88%
Total Return at Market ^{(e)(f)}	(7.74)%	14.96%
Ratio of Net Expenses to Average Net Assets ^(g)	0.95%	0.95%
Ratio of Gross Expenses to Average Net Assets ^{(g)(h)}	1.31%	1.13%
Ratio of Net Investment Income (Loss) to Average Net Assets ^(g)	(0.88)%	(0.90)%
Portfolio Turnover ^{(e)(i)}	51%	124%

(a) Commencement of operations.

(b) Calculated based on average shares method.

(c) Realized and unrealized gains per share are balancing amounts necessary to reconcile the change in net asset value per share for the period, and may not accord with the aggregate gains and losses in the Statements of Operations due to share transactions for the period.

(d) Net asset value total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, if any, and redemption on the last day of the period at net asset value. This percentage is not an indication of the performance of a shareholder's investment in the Fund based on market value due to differences between the market price of the shares and the net asset value per share of the Fund.

(e) Not annualized for periods less than one year.

(f) Market value total return is calculated assuming an initial investment made at the market value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, if any, and redemption on the last day of the period at market value. Market value is determined by the composite closing price. Composite closing security price is defined as the last reported sale price from any primary listing market (e.g., Nasdaq) or participating regional exchanges or markets. The composite closing price is the last reported sale price from any of the eligible sources, regardless of volume and not an average

price and may have occurred on a date prior to the close of the reporting period. Market value may be greater or less than net asset value, depending on the Fund's closing price on the listing market.

(g) Annualized for periods less than one year.

(h) If applicable, certain fees were waived and/or reimbursed. If such waivers/reimbursements had not occurred, the ratio would have been as indicated.

(i) Excludes the impact of in-kind transactions.

PRIVACY NOTICE

Collaborative Investment Series Trust

Rev. November 2017

FACTS	WHAT DOES COLLABORATIVE INVESTMENT SERIES TRUST DO WITH YOUR PERSONAL INFORMATION?
--------------	---

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
-------------	---

What?	<p>The types of personal information we collect and share depends on the product or service that you have with us. This information can include:</p> <ul style="list-style-type: none"> • Social Security number and wire transfer instructions • account transactions and transaction history • investment experience and purchase history <p>When you are <i>no longer</i> our customer, we continue to share your information as described in this notice.</p>
--------------	--

How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Collaborative Investment Series Trust chooses to share; and whether you can limit this sharing.
-------------	--

Reasons we can share your personal information:	Does Collaborative Investment Series Trust share information?	Can you limit this sharing?
For our everyday business purposes – such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	YES	NO
For our marketing purposes – to offer our products and services to you.	NO	We don't share
For joint marketing with other financial companies.	NO	We don't share
